

Table of contents

I The technology of straw bale building

1 Introduction 9

- Purpose and objectives of this book 9
- About the contents 9
- Building with straw – a contribution to sustainability in construction 10
- Further advantages of straw bale building 10
- Objections and anxieties 11

2 History and proliferation of straw bale building 13

- Early buildings (1880–1970) 13
- The development after 1980 15

3 Straw as building material 19

- General facts 19
- Straw bales 19
- Straw panels 20

4 Wall construction systems using straw bales 21

- Introduction to the construction systems 21
- Load-bearing straw bale walls 22
- Non-loadbearing straw bale walls 23
- Facing straw bale layer as thermal insulation 23
- Structural and dynamic aspects 23
- Summary and comparison of the individual systems 24

5 Roof and floor construction with straw bales 25

- Roof insulation 25
- Floor constructions 26
- Supplementary thermal insulation of existing structures 27

6 Physical aspects of straw bale building 28

- Heat storage and heat conductivity 28
- Thermal bridges 28
- Thermal insulation 29
- Moisture protection 30
- Moisture balance 33
- Wind and air tightness 34
- Fire protection 34
- Sound insulation 35

7 Designing a straw bale building 36

- Special aspects of load-bearing straw bale walls 36
- Special aspects of non-loadbearing straw bale walls 38
- Detailing of foundations 39
- Base details 40
- Wall build-up 40
- Wall junctions with foundation, base and floor 42
- Ring beams 43
- Windows and doors 44
- Wall corners 45
- Wall/Roof junctions 45
- Interior walls 45
- Intermediate ceilings 46
- Service ducts 46
- Heavy-duty fixings in straw bale walls 46
- Wall recesses 46

8 Surface protection and finishing works 48

- Interior render 48
- Exterior render 49
- Paint coats 52
- Water-repellent treatment 54
- Weather boarding, facing and ventilated cladding 55

9 The building process 56

- Supervision and co-ordination on site 56
- Health and safety measures 56
- Assessment of the quality of the bales 56
- Supplementary compaction of the bales 56
- Transport and storage 57
- Separating of bales 57
- Reshaping of bales 58
- Bale installation 59
- Wall reinforcement 59
- Wall prestressing 60
- Removal of deformations 61
- Back-filling of joints and gaps 62
- Cropping of bale surfaces 62
- Rendering of the walls 62

10 Trial and error – an example 63

- Preliminary note 63
- Scheme design 63
- Construction – the first attempt 65
- Solving the problems – the second attempt 69

11 Building cost, insurance, planning permission 71

- Building cost, expenditure of time and personal contribution 71
- Insurance of building 71
- Planning permission 72

II Built examples in detail 73

Residences

- Residential building in Ouwerkerk, Zeeland, the Netherlands 74
- Residential building in Balneario Punta Ballena, Uruguay 77
- Residential building in central Montreal, Canada 78
- Prefabricated single-family home in Hitzendorf, near Graz, Styria, Austria 80
- Single-family home in Dobersdorf, Burgenland, Austria 82
- Urban cottage in Berkeley, California, USA 84
- Single-family home in Bryson City, North Carolina, USA 86
- Single-family home with guest house, games room and garage in Galston, near Sidney, Australia 88
- Single-family home in Lower Lake, California, USA 90
- Single-family home at Lake Biwa, Japan 92
- The Spiral House, Castlebar, County Mayo, Ireland 94
- Load-bearing straw bale house in Disentis, Switzerland 96
- Passive house in Cavan, Ontario, Canada 98
- First straw bale house in Vienna, Austria 100
- Single-family home in Blanden, Belgium 103
- Low-energy house in Maria Laach, Austria 104
- Passive house in Wienerherberg, Austria 106

Home and workplace

- Trout Farm Complex, Tassaraja Canyon, California, USA 108
- Residential and office building in London, United Kingdom 110

Ulenkrug Farm, Stubbendorf, Mecklenburg-West Pomerania, Germany 113

- Residential building for ethnic German resettlers, Wargoldshausen, Lower Franconia, Germany 114
- The Woodage Sawmill in Mittagong, Australia 116
- Straw bale dome as a rehearsal and performance space in Forstmehren, Westerwald, Germany 118
- Farm and residential building near Rothenburg ob der Tauber, Franconia, Germany 121
- House of a painter near Santa Cruz, California, USA 123

Educational and cultural buildings

- Foothills Academy College Preparatory, Scottsdale, Arizona, USA 125
- Real Goods Solar Living Center, Hopland, California, USA 128
- International Sivananda Yoga Vedanta Center Lodge, Val-Morin, Quebec, Canada 130
- Waldorf school in Carbondale, Colorado, USA 132
- Salem Children's Village, Kaliningrad, Russia 134
- Sanctuary House, Crestone, Colorado, USA 136
- Vipassana Meditation Hall, Blackheath, Australia 137

Appendices 138

- Measures 138
- Networks 139
- Internet links 140
- Bibliography 142
- Acknowledgements 143
- Illustration credits 143
