

CONTENTS

1. INTRODUCTION

Why this guide?	7
When and how to use the guide?	8
How is the guide set out?	8

2. THE COMPRESSED EARTH BLOCK

Presentation	9
Diversity of product	11
Position in relation to other materials	12
Technical performance	14
General specifications	16
Conditions of use	18
Current norms	22
Examples of compressed earth block buildings	24

3. THE TECHNOLOGY OF PRODUCTION

Production cycle	32
The raw material: soil	34
Stabilization	36
Production equipment	38
Pulverizers	44
Screens	47
Mixers	49
Presses	52

4. EQUIPMENT SELECTION

General selection criteria	65
Selection criteria for presses	68

5. INVENTORY OF EQUIPMENT

Inventory of pulverizers	72
Inventory of mixers	78
Inventory of presses	86
Index of equipment	110

CONTENTS

6. DIRECTORY OF MANUFACTURERS AND DISTRIBUTORS 114

7. BRICKWORKS

Types of brickworks and capital investments	125
Semi-mechanized brickworks	128
Fully mechanized brickworks	130
Manufacturing and organization parameters: a quality approach	132

8. THE FEASIBILITY STUDY

The six phases of a project	135
The feasibility study	135
Financial and economic evaluation	136
Production cost	136
Unit cost price	137
Break-even point	138
The degree of sensitivity of the unit cost price	139
The degree of sensitivity of the brickworks	140

SERVICES OFFERED

Centre for the Development of Industry - CDI	
A tool for the development of industrial enterprises in ACP countries	143
International Centre for Earth Construction - CRATerre-EAG	147
Building Advisory Service and Information Network - BASIN	149
