

Introduction	6	Urban design	68
Principles	8	Impact of energy-related aspects on the urban design	68
Concept approach: energy efficiency	8	Design principles of compact and solar building	69
Definition of the Passive House standard	8	Model urban design guidelines	72
Passive House components	8	Reference projects	73
How does a Passive House work at different times of the year?	10	Completed Passive House developments	74
Thermal comfort and wellbeing	12	Non-residential building	76
Scope and field of application	14	Passive House principles in non-residential buildings	76
Economy	16	Energy balance	77
Energy-related sustainability and climate protection	18	Features of different building typologies	80
Passive House planning	22	Reference buildings – non-residential	84
Main principles and comparison with other standards	22	Passive House refurbishment	100
Passive house criteria	22	Conditions for an energy efficiency refurbishment	100
Passive House Planning Package (PHPP)	24	Refurbishment standards and strategies	102
Certified building components	28	Energy balance and individual measures	103
Certification of Passive House buildings	28	Outlook	105
Certified Passive House designers	28	Reference buildings – Passive House refurbishments	106
EnerPHit standard	28	Building envelope components	126
Minergie-P standard	30	Significance of the building envelope	126
2000-Watt Society – SIA D 216	31	Opaque envelope constructions	126
Net-zero energy standard	31	Transparent components	129
Design and planning principles	32	Other construction elements and special components	131
General design issues	32	Building methods and construction systems	132
Passive House design principles	34	Building services	134
Principle of thermal envelope and form factor	34	Ventilation	134
Principle of homogeneity	36	Space heating	139
Solar building design in Passive Houses	38	Heat supply concepts	140
The importance of window placement	40	Energy-efficient cooling systems	143
Basic principles of Passive House building services	42	Outlook	144
Design-based energy balance	44	Appendix	146
Impact of regional and urban climate	46		
Coordination of individual aspects	46		
Residential projects	46		
Reference buildings – residential	48
